*(Zobrist)*

Extension programs and employment are available to all without discrimination. Evidence of noncompliance may be reported through your local Extension office.

## RECOMMENDED READING

*None this week*

## RECOMMENDED ACTIVITIES

1. The Special Forest Products section is an optional section of your plan. Create a draft of it if you plan to manage for Special Forest Products on either a commercial or hobby scale.
2. \* Walk your property and identify invasive species issues that you have and what steps you might need to take to address these problems. Incorporate this information into the appropriate section(s) of your plan (could be forest health, timber/wood products, water resources, or elsewhere as you find appropriate).
3. \* Complete the management checklist (you can find a copy of this document on your CD-ROM). Make sure your checklist matches up with your timeline.
4. \* Please bring your completed course evaluation and your tool vests to the last class!
5. \* Prepare what you would like to share with the class next week about your plans to steward your property.
6. When you have finished with a complete draft of your plan, submit an electronic copy for review to whomever did your site visit (Kristi, Bill, Kevin, or WA DNR staff).

## CONNECT ONLINE

*Using your home computer or a computer at your local library, check out these additional resources that are available to you online:*

1. See what resources are available in the following sections of the forest stewardship website:
  - a. Invasive Species - <http://snohomish.wsu.edu/forestry/resources.htm#invasive>
  - b. Cultural Resources - <http://snohomish.wsu.edu/forestry/resources.htm#cultural>

*\* Top priorities for this week*
